

October 27, 2014

Free STD clinic Monday, November 3rd.

STDs often have no symptoms, but if left untreated, they can lead to serious health problems, especially for young women. Every year in the U.S., about 24,000 women become infertile from untreated STDs, which means they may never be able to have kids. Men might have symptoms such as burning or discharge.

It's important to get tested regularly. All STDs are treatable; many are curable.

The free STD clinic at Union Gospel Mission Clinic at 15 S Front Street offered by Life Choices is a great place to start with testing and treatment for Chlamydia and Gonorrhea, the 1st Monday of every month, 4-8 p.m.

Get tested.

If you have any questions about this announcement or other services we offer, please contact me. Thank you.

Sincerely,

Joddi-Jay Babcock, M. A.
